Mafutsane Secondary School / 2019

LINKS

I am a junior developer, with hands-on experience in supporting and maintaining existing solutions, as well as developing new ones. I am skilled in automating processes, monitoring builds, and deploying code across various environments. I thrive in collaborative environments, utilizing version control systems to allow team collaboration. My passion for problem-solving and continuous learning drives me to contribute effectively to projects and ensure the delivery of solutions

WORK EXPERIENCE

Discovery

Feb 2024 - Present
Sandton

JAVA DEVELOPER(JUNIOR)

Offer support and mainitance on the authorization system, utilizing tools such:

- Java and the Spring framework for building solutions, whether it be features or supporting already existing code.
- Jenkins to monitor and automate builds as well as deploying the code onto various environments.
- Perform server checks and troubleshooting to resolve any failed deployments or restarts.
- Git and Gitlab to store and retrieve source code from and to the teams repo.
- Docker to run images that are required for certain projects.
- Kibana to search through logs as part of an investigation to an issue.
- Rules engine, to write business rules required for
